## **Using the bike rack**

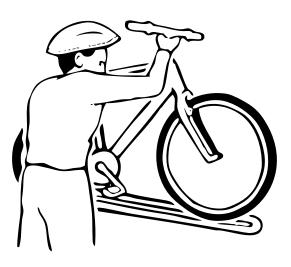

Loading Remove all loose items from the bike before the bus arrives. Gain the driver's attention. Load your bike from the kerb side. Follow the four easy steps below.

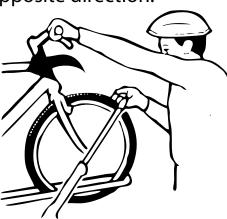

Squeeze handle up to release latch, then fold down the bike rack.

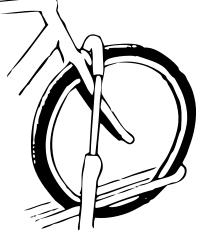

Lift bike into rack slots with the front wheel towards the spring-loaded bar.

Raise the spring-loaded bar up over the front wheel of the bike. If a bike is already in rack, load your bike with your handle bars in the opposite direction.

Spring-loaded bar will lock down front wheel as shown.

## Unloading

As you approach your stop inform the driver that you need to remove your bike. Raise the spring-loaded bar and fold it down. Lift bike out of rack. Squeeze handle and fold bike rack back into place if empty. Step back onto the footpath and wave to the driver to indicate that you and the bike are clear of the bus.
